

◆ Low-code / No-code Development Services – Detailed Breakdown

◆ Overview

Accion Labs provides **enterprise-grade low-code/no-code (LCNC) development services** to accelerate application delivery while maintaining governance, security, and scalability.

- App development speed improved by **50–70%**
- Enables **business + IT collaboration**
- Reduces dependency on traditional development cycles

👉 Focus: **Faster delivery without compromising architecture, compliance, or control**

◆ 1. Core Value Proposition

✓ Accelerated Development

- Build applications significantly faster than traditional coding
- Reduce time-to-value from months to weeks

✓ Business + IT Collaboration

- Empowers business users (“citizen developers”)
- IT retains full control over:
 - Architecture
 - Security
 - Lifecycle management

✓ Enterprise Governance

- Ensures:
 - Compliance standards
 - Secure deployments
 - Scalable architecture

👉 Outcome: **Speed + control + scalability together**

◆ 2. Key Low-code / No-code Services

1. Low-code Application Development

- Build enterprise applications using:
 - Mendix
 - OutSystems
 - Microsoft Power Apps
- Ensures:
 - Extensibility
 - Maintainability
 - Security

👉 Use cases:

- Internal enterprise apps
- Customer portals
- Workflow systems

2. No-code Automation Platforms

- Build automation workflows with minimal coding
- Platforms used:
 - Zapier
 - Appian
 - Unqork

👉 Enables:

- Process automation
- Faster deployment of workflows
- Reduced engineering dependency

3. Platform Evaluation & Strategy

- Helps select the right LCNC platform based on:
 - Integration requirements
 - Complexity of applications
 - Scalability needs
 - User autonomy

👉 Ensures:

- Fit-for-purpose adoption
- Avoids shadow IT risks

4. UX/UI & Workflow Design

- Design intuitive interfaces and workflows
- Focus areas:
 - User behavior
 - Accessibility
 - Compliance

👉 Outcome: **High adoption + better user experience**

5. Enterprise API Management & Integration

- Connect LCNC apps with:
 - ERP
 - CRM
 - HR systems
- Uses:
 - Secure APIs

- Message queues

👉 Ensures:

- Real-time data flow
 - System interoperability
-

6. Governance & Security Alignment

- Implements:
 - Role-based access control
 - Audit logs
 - CI/CD pipelines
 - DevOps integrations

👉 Ensures:

- Compliance with enterprise policies
 - Risk-controlled deployments
-

◆ 3. Proprietary Tools & Accelerators

◆ KAPS Framework

- Defines:
 - Governance boundaries
 - Platform maturity
 - Reusability policies

◆ Breeze.AI

- Refactors legacy systems
- Converts them into reusable services for LCNC apps

◆ AssetIQ

- Monitors:
 - Application performance
 - Usage metrics
 - Security posture

👉 Benefit: **Faster adoption + better governance + visibility**

◆ 4. Key Benefits / Outcomes

✓ Faster Delivery

- 60–70% reduction in development cycles

✓ Cost Efficiency

- Lower development and maintenance costs

✓ Process Digitization

- Automates workflows across departments

✓ Scalable Enterprise Apps

- Supports enterprise-grade applications

✓ IT Governance Retained

- Centralized control over:
 - Security
 - Compliance
 - Lifecycle

👉 Result: **Speed without sacrificing enterprise standards**

◆ 5. Differentiators (Why Accion Labs)

✓ Industry-Aligned Implementations

- Experience across:

- BFSI
 - Healthcare
 - Logistics
 - Education
-

✓ Strong Governance Focus

- Balance between:
 - Business flexibility
 - IT control
-

✓ Cross-functional Teams

Includes:

- Solution architects
 - Automation specialists
 - UI/UX designers
 - LCNC engineers
-

✓ Proven Results

- Demonstrated reduction in development time
- Enterprise-scale implementations

👉 Focus: **Controlled innovation at scale**

◆ 6. Use Cases / Applications

Common applications built using LCNC:

- Workflow automation (approvals, routing)

- Business applications (CRM, inventory, project management)
 - Customer-facing apps (portals, mobile apps)
 - Data dashboards & reporting tools
 - Integration layers across enterprise systems
-

◆ 7. Enterprise Capabilities

✓ Security & Compliance

- SSO, OAuth, Active Directory
- Data encryption
- Audit trails
- Compliance certifications (SOC2, ISO, etc.)

✓ Integration Capabilities

- Pre-built connectors (Salesforce, SAP, Microsoft 365)
- REST APIs
- Event-driven architectures

👉 LCNC acts as a **central integration layer across enterprise systems**

◆ 8. End-to-End Service Offering

Accion Labs also provides:

- Platform strategy & consulting
- Application development
- Center of Excellence (CoE) setup
- Integration services
- Application modernization
- Managed services (support & maintenance)

- Citizen developer training programs
-

✅ Executive Summary

Accion Labs' Low-code/No-code services are built on **3 core pillars**:

◆ 1. Speed

- 50–70% faster development

◆ 2. Governance

- Enterprise-grade security & compliance

◆ 3. Scalability

- Built for complex enterprise environments
-

▼ One-line takeaway:

👉 *Accion Labs enables enterprises to build applications faster using low-code/no-code platforms—without losing control over security, architecture, or scalability.*
